PROFESSIONAL SUMMARY

Results-oriented Data Analyst with hands-on experience in data cleaning, data modeling, statistical analysis, and business intelligence reporting. Skilled in Python, SQL, Power BI, Tableau, Excel, and Machine Learning to build interactive dashboards, automate reporting workflows, and translate complex datasets into actionable, data-driven insights. Experienced in cross-functional collaboration and stakeholder communication, partnering with teams to define KPIs and support evidence-based decision-making. Adept at end-to-end analytics — from data extraction and cleaning through visualization and predictive modeling.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI, DAX, Tableau, Excel, Cognos Analytics, KPI Reporting, Data Visualization, Business Intelligence, Data Modeling, Data Cleaning, Statistical Analysis, Business Reporting

Programming & ML: Python, Java, JavaScript, Machine Learning, Predictive Analytics, Flask

Development & Tools: React, Node.js, HTML, CSS, Bootstrap, Chart.js, Git, REST APIs, Authentication, Microsoft Office

Professional: Stakeholder Management, Stakeholder Communication, Cross-Functional Collaboration, Data-Driven Decision Making

PROFESSIONAL EXPERIENCE

Data Analyst Intern

09/2025 – 10/2025

NoviTech R&D Private Limited

- Performed data cleaning and structured data analysis using Excel, SQL, and Power BI to transform raw datasets into interactive dashboards, uncovering business trends and delivering reliable, stakeholder-ready reporting.
- Leveraged Power BI, DAX, and data modeling techniques to build interactive business intelligence dashboards during a 21-day industry internship, presenting findings to internal stakeholders.

Data Science & Data Analytics Intern

05/2025 – 07/2025

Innovate Intern (HexaInd)

- Applied Python, SQL, Tableau, and Machine Learning to clean, analyze, and model complex datasets, performing statistical analysis to develop predictive models and deliver actionable insights during an 8-week Data Science Internship.

AI & Full Stack Developer Intern

12/2025 – 04/2026

Kambaa Incorporation

- Developed role-based enterprise applications, including a Petty Cash Management System that optimized workflow management and administrative operations.
- Implemented AI-driven features for a Notes Maker platform, including transcription, summarization, authentication, and external application integrations.
- Designed Knowledge Base and AI Chatbot solutions with role-based access control, user support functionalities, and centralized knowledge management.

Machine Learning Intern

05/2026 – 05/2026

Adroit Technologies Innovative Career (IBM Career Education)

- Developed and deployed an AI-powered Equipment Failure Prediction System using Machine Learning and Flask.
- Applied end-to-end ML workflows and predictive analytics to forecast equipment failures and support proactive maintenance strategies.

Data Analyst Intern

01/2026 – Present

Bluestock Fintech

- Delivered business insights to cross-functional stakeholders through financial and operational data analysis, KPI reporting, and interactive dashboards.
- Enhanced data quality and decision-making using data cleaning, transformation, validation, and business intelligence practices, ensuring accurate and consistent business reporting.

PROJECTS

AnalystOS – Career & Placement Management System | Python, Flask, SQL, HTML, CSS, JavaScript, Bootstrap, Chart.js

- Engineered a personal career management platform that consolidates placement preparation into a single dashboard, replacing multiple spreadsheets and productivity tools.
- Designed modules for tracking coding practice, projects, internships, certifications, resume versions, and interview preparation with progress visualization.

Mutual Fund Analytics Dashboard | Investment analysis and fund comparison platform

- Built a mutual fund analytics platform helping investors evaluate opportunities using data-driven insights — historical performance, risk metrics, returns, and portfolio statistics through interactive dashboards.

EarthQuake Alert System | *IOT, C*

- Developed an IoT-based Earthquake Alert System integrating vibration sensors, embedded systems, and cloud communication to detect seismic activity and trigger real-time alerts.
- Implemented sensor-driven monitoring and automated notification mechanisms to support early-warning capabilities and enhance emergency response readiness.

Petty Cash Management System | *React.js, Node.js, Express.js, MySQL*

- Developed a full-stack Petty Cash Management System to streamline expense tracking and financial record management.
- Implemented RESTful APIs, balance tracking, and transaction monitoring to improve accuracy, visibility, and operational efficiency.

Canteen Management System | *Node.js, MySQL, JavaScript, HTML, CSS*

- Developed a full-stack Canteen Management System with user authentication, real-time order tracking, and admin controls.
- Streamlined food ordering, transaction management, and operational workflows through a responsive web application.

Knowledge Base Portal | *React.js, Node.js, Express.js, MongoDB, REST APIs*

- Developed a full-stack Knowledge Base System to centralize and manage organizational knowledge.
- Implemented search, content management, and dynamic updates to improve information accessibility and collaboration.

AI Equipment Failure Prediction System | *Python, Machine Learning, Flask, Predictive Analytics*

- Engineered an AI-powered predictive maintenance platform to forecast equipment failures.
- Implemented end-to-end ML workflows, model deployment, and real-time monitoring to enable proactive maintenance and improve asset reliability.

Internship Tracker Dashboard | *Business Intelligence & Analytics Project*

- Engineered an Internship Tracking and Analytics Dashboard to monitor applications, interviews, offers, and hiring metrics.
- Implemented responsive UI, API integrations, and analytical reporting features to improve recruitment visibility and decision-making.

Travel Website | *Tourism & Digital Experience Platform*

- Engineered a Travel & Tourism Platform featuring destination discovery, travel planning, and user engagement functionalities.
- Built responsive interfaces and REST API integrations to deliver seamless navigation, improved accessibility, and scalable web experiences.

VIRTUAL EXPERIENCE

Deloitte Australia – Data Analytics Job Simulation (Forage)

- Performed data cleaning, analysis, and visualization using Excel and Tableau.
- Developed interactive dashboards to communicate business insights and delivered data-driven recommendations to support strategic decision-making.

Deloitte Australia – Cyber Job Simulation (Forage)

- Analyzed cybersecurity scenarios to identify risks and recommend mitigation strategies.
- Applied incident response and cyber risk management principles to simulated business cases, strengthening knowledge of enterprise security best practices.

EDUCATION

CS with Data Analytics | CGPA: 9.0

2024 – 2027

Sri Ramakrishna College of Arts & Science for Women, Coimbatore

CERTIFICATIONS

Data Analytics & BI: IBM – Data Analysis with Python | IBM – Data Visualization | IBM – Python for Data Science | IBM – Business Intelligence | NoviTech – SQL

AI & Automation: GUVI – Generative AI | UiPath Academy – Automation Developer Associate Training

Programming: GUVI – Python Programming | Infosys – C Programming 101 | Infosys – Computer Fundamentals

SOFT SKILLS

Analytical Thinking | Problem Solving | Critical Thinking | Communication | Attention to Detail | Teamwork
