

POORANI S | *Data Analyst*

Coimbatore , India | 6380045604 | poorani372006@gmail.com | [Linkedin](#) - Poorani | [Github](#) - Poorani

Career Objective

Results-oriented Data Analytics student with practical experience in data analysis, predictive modeling, and business intelligence solutions. Adept at using Python, SQL, Power BI, and Tableau to extract insights, develop interactive dashboards, and support strategic decision-making. Strong foundation in data visualization, reporting, and machine learning applications. Passionate about delivering impactful, data-driven solutions to real-world business challenges.

PROFESSIONAL EXPERIENCE

Data Analyst Intern 09/2025 - 10/2025
NoviTech R&D Private Limited

- Utilized Excel, SQL, and Power BI to transform raw datasets into interactive dashboards, uncover business trends, and deliver reliable insights through structured data analysis and reporting.

Powerbi Intern 09/2025 - 09/2025
NoviTech R&D Private Limited

- Leveraged Power BI, DAX, and data modeling to transform raw datasets into interactive business intelligence dashboards during a 21-day industry internship at NoviTech R&D Pvt. Ltd.

Data Science & Data Analytics Intern 05/2025 - 07/2025
Innovate Intern (Hexaind)

- Applied Python, SQL, Tableau, and Machine Learning to analyze complex datasets, develop predictive models, and deliver actionable insights during an 8-week Data Science Internship.

AI & Full Stack Developer Intern 12/2025 - 04/2026
Kambaa Incorporation

- Developed role-based enterprise applications, including a Petty Cash Management System that optimized workflow management and administrative operations.
- Implemented AI-driven features for a Notes Maker platform, including transcription, summarization, authentication, and external application integrations.
- Designed Knowledge Base and AI Chatbot solutions with role-based access control, user support functionalities, and centralized knowledge management.

Machine Learning Intern 05/2026 - 05/2026
Adroit Techhnologies Innovative Career (IBM Career education)

- Developed and deployed an AI-powered Equipment Failure Prediction System using Machine Learning and Flask.
- Applied end-to-end ML workflows and predictive analytics to forecast equipment failures and support proactive maintenance strategies.

Data Analyst Intern 01/2026 - Present
Bluestock Fintech

- Delivered business insights through financial and operational data analysis, KPI reporting, and interactive dashboards.
- Enhanced data quality and decision-making using data transformation, validation, and business intelligence practices.

Technical Skills

SQL | Power BI | Excel | Python | Machine Learning | Data Analysis | Data Visualization | Business Intelligence | Cognos Analytics | AI | JavaScript | Git | Authentication | React | Java | Microsoft Office

Soft Skills

Analytical Thinking | Problem Solving | Critical Thinking | Communication | Attention to Detail | Teamwork

EDUCATION

CS WITH DATA ANALYTICS CGPA: 8.9	2024 - 2027
SRI RAMAKRISHNA COLLEGE OF ARTS & SCIENCE FOR WOMEN	Coimbatore

PROJECTS

EarthQuake Alert System

- Developed an IoT-based Earthquake Alert System integrating vibration sensors, embedded systems, and cloud communication to detect seismic activity and trigger real-time alerts.
- Implemented sensor-driven monitoring and automated notification mechanisms to support early-warning capabilities and enhance emergency response readiness.

Petty Cash Management System

- Developed a full-stack Petty Cash Management System using React.js, Node.js, Express.js, and MySQL to streamline expense tracking and financial record management.
- Implemented RESTful APIs, balance tracking, and transaction monitoring to improve accuracy, visibility, and operational efficiency.

Canteen Management System

- Developed a full-stack Canteen Management System using Node.js, MySQL, JavaScript, HTML, and CSS with user authentication, real-time order tracking, and admin controls.
- Streamlined food ordering, transaction management, and operational workflows through a responsive web application.

Knowledge Base Portal

- Developed a full-stack Knowledge Base System using React.js, Node.js, Express.js, MongoDB, and REST APIs to centralize and manage organizational knowledge.
- Implemented search, content management, and dynamic updates to improve information accessibility and collaboration.

AI Equipment Failure Prediction System

- Engineered an AI-powered predictive maintenance platform using Python, Machine Learning, Flask, and Predictive Analytics to forecast equipment failures.
- Implemented end-to-end ML workflows, model deployment, and real-time monitoring to enable proactive maintenance and improve asset reliability.

Internship Tracker Dashboard (Business Intelligence & Analytics Project)

- Engineered an Internship Tracking and Analytics Dashboard to monitor applications, interviews, offers, and hiring metrics.
- Implemented responsive UI, API integrations, and analytical reporting features to improve recruitment visibility and decision-making.

Travel Website (Tourism & Digital Experience Platform)

- Engineered a Travel & Tourism Platform featuring destination discovery, travel planning, and user engagement functionalities.
- Built responsive interfaces and REST API integrations to deliver seamless navigation, improved accessibility, and scalable web experiences.

CERTIFICATIONS

- Data Analytics & BI**
 - IBM – Data Analysis with Python
 - IBM – Data Visualization
 - IBM – Python for Data Science
 - NoviTech – SQL
- AI & Automation**
 - GUVI – Generative AI
 - UiPath Academy – Automation Developer Associate Training
- Programming**
 - GUVI – Python Programming
 - Infosys – C Programming 101
 - Infosys – Computer Fundamentals
